Pension Distribution & Anomaly Detection

ANNUAL PENSION AMOUNTS / NUMBER OF CLAIMS

CLAIMS FLAGGED FOR REVIEW

$210–$299 per year

3 of 40 fictional claims

Amounts at or above $210 are highlighted for closer historical record review.

Threshold is illustrative.

STORY

Which pension amounts appear unusually high in the sample?

DATA TO EXPLORE

Pension applications, award amounts and payment ledgers

QUANTIFIABLE

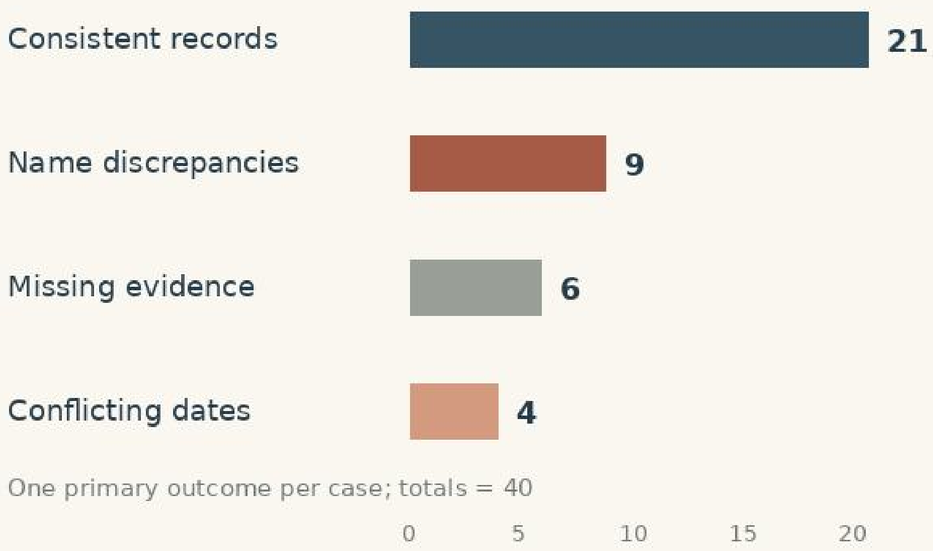

Claims per payment range; frequency of high amounts

QUALITATIVE EVIDENCE

Petitions and testimony may explain unusual payments

Identity Verification & Record Matching

RECORD-COMPARISON OUTCOMES / 40 CASES

EXAMPLE: FICTIONAL CASE OF MARY CARTER

Compared against details in her pension petition

	NAME	DATE	RELATION
Marriage register	**Match**	**Conflict**	**Match**
Census entry	**Conflict**	**Match**	N/A
Service record	N/A	**Match**	**Conflict**

N/A = not available or not comparable

STORY

How was a widow's identity and eligibility established?

DATA TO EXPLORE

Petitions, marriage registers, census and service records

QUANTIFIABLE

Matches, conflicts, and gaps by type and record source

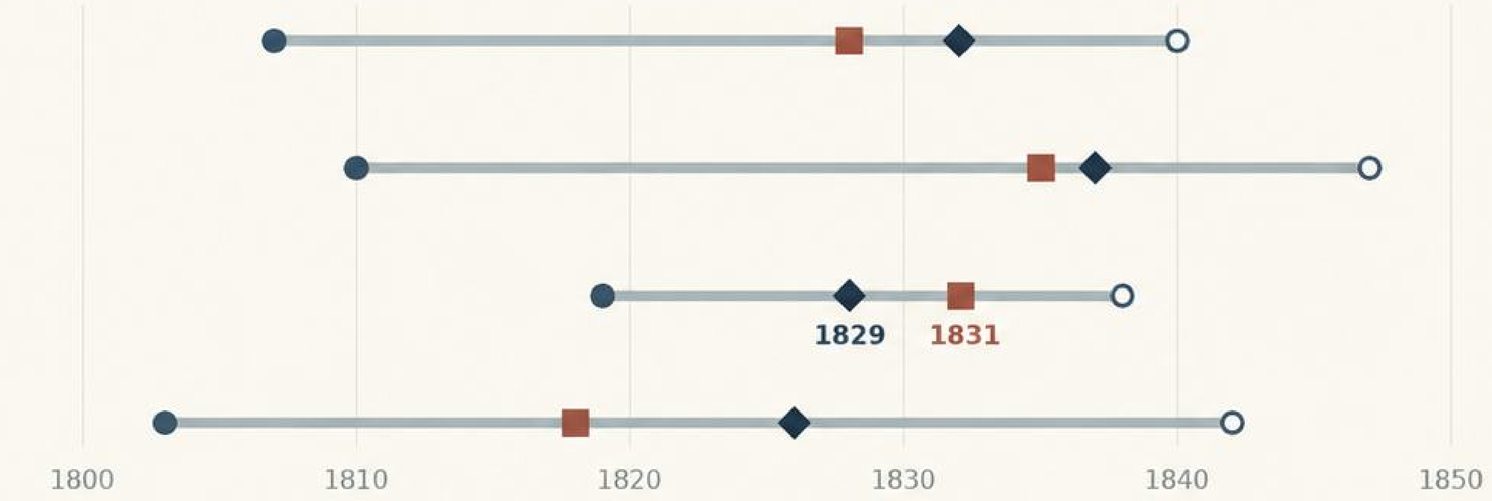

QUALITATIVE EVIDENCE

Affidavits and testimony may clarify discrepancies

Pension Timelines & Chronological Inconsistencies

DATED EVENTS / COMMON TIME AXIS

Fictional dates; one row represents one widow's case

EVENT LEGEND

- Marriage
- Veteran's death
- Pension petition
- Last payment

CASE C: DATE CONFLICT

Petition: 1829

Veteran's death: 1831

STORY

Where do dates in individual pension files contradict?

DATA TO EXPLORE

Marriage, veteran death, petition and payment dates

QUANTIFIABLE

Event sequence, time gaps and contradictory dates

QUALITATIVE EVIDENCE

Depositions and case files may explain uncertain dates
